COMPONENTS: (1) Cycloheptene; C₇H₁₂; [628-92-2] McAuliffe, C. (2) Water; H₂O; [7732-18-5] J. Phys. Chem. 1966, 70, 1267-75. VARIABLES: One temperature: 25°C PREPARED BY: A. Maczynski, Z. Maczynska, and A. Szafranski

EXPERIMENTAL VALUES:

The solubility of cycloheptene in water at 25°C was reported to be 66 g(1)/ 10^6 g(2).

The corresponding mass percent and mole fraction, x_1 , calculated by the compilers are 0.0066 g(1)/100 g sln and 1.2 x 10^{-5} .

AUXILIARY INFORMATION

METHOD/APPARATUS/PROCEDURE:

In a 250-mL bottle, 10-20 mL of (1) was vigorously shaken for 1 hr, or magnetically stirred for 1 day, with 200 mL of (2) at 25°C. The bottle was set aside for 2 days to allow droplets of undissolved (1) to separate. Absence of emulsion was checked microscopically. A sample of the hydrocarbon-saturated water was withdrawn with a Hamilton syringe and gas liquid chromatographed in conjunction with a flame-ionization detector.

SOURCE AND PURITY OF MATERIALS:

- (1) Phillips Petroleum or Columbia Chemical; used as received.
- (2) distilled.

ESTIMATED ERROR:

temp. ± 1.5 K
soly. 4 g(1)/10⁶ g(2)
 (standard deviation of mean)
